

FUCK ALL \$YSTEMS

AMBASSADOR21

In celebration its 5th anniversary, AMBASSADOR21 and Invasion Wreck Chords proudly presents 5th AMBASSADOR21 full-length album "FUCK ALL \$YSTEM\$".

If you are looking for clean intelligent sound - forget it. It's impossible to insert this belorussian duo expression into generally accepted stereotype of exemplary life. This album deserves its name completely, it is saturated by pure energy from the first till last minute.

If you have strong imagination about what that - AMBASSADOR21, if you know what you are waiting for - get it. Are they more diverse? Yes. More deep? Yes. More electronic? Yes.

Does they changed? No. They are strong and sexy.

Dense and noisy electro hardcore wall of sound which can be ferocious and merciless. But their anger always with a smile - from ambivalent ironic lyrics in Russian and English to forceful pounding industrial kicks, brutal synth layers and explosive broken beats seasoned by psychopathic glitches.

And duel of earfucking vocals which make their music absolutely unique.

That's AMBASSADOR21 as you have learned to like them - but harder, louder, younger. Ultra fucking destroy.
