power rage (face your future killers)

If we have press-agent, you can read now something like "smashed drums", "ultra fast broken beats", "sharp guitar riffs", "earfucking duel of vocals", "wall of noise", "absolutely dancefloor killers", and again about guitars - "hard, speedy, motorbike sounding", and again about drums - "punchy hammerbeats", and again about noise - "king size", and again about vocals - "mouth full of nails, unique, sexy". If we have press-agent, you can read: "industrial", "hardcore", "breakcore", "gabber", "noise", "digital hardcore". If we have press-agent, you can read: "must have", "strongly recommended", "you can love it or hate it, but you can not stay in the middle".

But we have not.

We made this album, just because we are. We believe one hundred percents everything we says. We don't make music - we are the music. It's sound of underground. It's our rock'n'roll.

Are you ready for blowjob, suckers? Bon courage!

Yours,
